

Vinitan[®] Advance

100% pure grape tannin. Participates in colour stabilisation and balances oxidoreduction reactions.

PRODUCT CHARACTERISTICS

- ◆ **Formulation:** Pure grape tannin with low phenol content.
- ◆ **Enological benefits:** Vinitan[®] Advance is a pure grape tannin produced according to strict purity and quality guidelines. It is the ideal tannin for **red wines with ageing potential**.

Its ability to react with proteins helps inhibit Laccase activity (anti-oxidase) and facilitates clarification

Vinitan[®] Advance **contributes to colour stability** and protects against premature colour loss (tannin-anthocyanin stabilisation). When used at the beginning of aging, it helps to protect against oxidation.

DIRECTIONS FOR USE

- ◆ Instantly soluble, Vinitan[®] Advance is ready to use. Dissolve in 10 times its weight in wine. Add into the tank during a pump-over or during a transfer in order to have a perfect homogenisation. Il s'emploie pour les vins rouges de garde, en cours d'élevage ou peu avant la mise en bouteille.
- ◆ **Dosage:** *During fermentation or post running-off:* 5 to 30 g/hL. *During ageing:* 2 to 10 g/hL.
The dosage of tannins depends of each type of wine and winemaking imperatives to be achieved. Take advice from your oenologist in order to comply with the oenological codex (OIV).
Lamothe-Abiet provides single-dose samples (for one bottle) to simplify the calculation of the treatment.
